TAEKWONDO FIGHTER SUIT

Taekwondo Suit is new beginning of Taekwondo. KPNP Taekwondo Suit symbolizing Taegeuk image was designed to maximize performance of Athletes with ergonomic design that enables maximum comfort and flexibility.

TAEKWONDO TRAINING SUIT

Made with SpanDex fibers, KPNP Taekwondo Suit helps increasing performance efficiency and maximum comfort. By applying ventilating fabrics on major spots like backs, arms and thighs, it controls heats of body effectively.

VISCO ELASTAN

With VISCO Elastine Material, KPNP created protective guards that is light-weight while providing effective protection

KPNP SHIN GUARD

KPNP Shin Guard is produced by 3D Compression molding process to enhance fitness. The dual structure of Memory Elastan and EVA increases the effective protection.

VISCO ELASTAN

With VISCO Elastine Material, KPNP created protective guards that is light-weight while providing effective protection

KPNP ARM GUARD

KPNP Arm Guard was designed to cover up to elbows by 3D Compression Molding process to enhance fitness and effective protection. Closely fitting to the arms, KPNP Arm Guard provides enhanced protection during the competition.

E - BODY PROTECTOR

KPNP E-Body Protector is being developed to ensure maximum comfort, flexibility and free movement of Athletes's during the competition

E - HEAD GEAR

Re-imagination combined with new material, we bring the Taekwondo Head Protector to a whole new level.

E - SOCKS

Taekwondo Socks are one of the most important gear that directly affect Athlete's performance. Newly designed Taekwondo Socks was created to provide comfort and flexibility with ergonomic shape and cushion insert

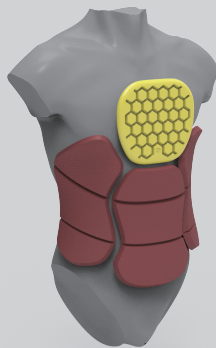

KPNP GLOVE

Exclusively developed and design for Taekwondo to provide maximum protection and efficiency

ERGONOMICAL PATTERN
ERGO - FIT

Unique PU materials in plain sheet form is called the Visco Elastan. It is ideal for areas where extreme shock absorption is required. We applied Visco Elastan to the chest to protect Athletes while the impact delivered to the chest can also be accurately measured.

VISCO
ELASTAN

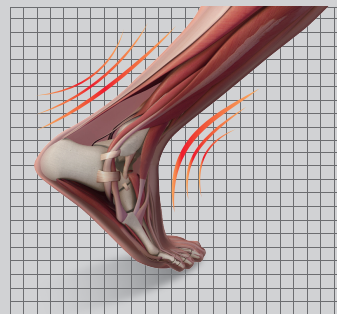

VITAL POINT PROTECTOR

Dedicated to develop a new head gear, KP&P decided to change production method from traditional dipping process to a reliable molding process.

VISCO ELASTAN

What is the core function of the head gear? It is to protect Athletes from severe injury and let the players present their best performance during competition. Using Memory Elastan, impact absorption can be maximized and injury can be minimized.

ERGO - FIT

PERFORMANCE DRIVEN E-SOCKS

- The cushion covering the top of the foot efficiently absorbs the impact.
- The incision on the foot hill enables free movement of the feet.
- New KPNP Taekwondo E-Socks holds the whole feet tight and supplements the contraction and release of muscle.
- New KPNP Foot Protector was designed to reduce the possibility of injury.

RECOVERY
SHAPE RECOVERY FOAM

BEST HAND PROTECTOR - KNUCKLE SHELL

Used for the Motorbike protectors, the knuckle shell gives maximum protection and comfort to the wearer. Ultra-light shell offers an optimal balance between protection and natural grip.

COMPRESSION TEST

Ambient Temperature 22°C / 72 hours

Recovery Foam	EVA	NBR
96.20%	59.50%	70.60%

Keep the Patience and Persistence
